### STORY

After the collapse of the satsuma industry, the town became stagnant, but Eda, a young worker at the agricultural cooperative, comes up with an idea of selling leaves. Despite stiff opposition from the entire town, two women, Hanae, for a giggle, and Kaoru who could not say no to Hanae, join in preparing leaves without telling their families, but the leaves they ship out are treated as rubbish. Kaoru and the others are disappointed but then Michiko, the daughter of a flower and tree growing farmer returns from the city and gives them advice. Just when the leaves start selling, Kaoru's vinyl greenhouse gets destroyed by fire.
